Frame naming

Introduction

Frame selectors are the elements that produce the layout's structural effect. These elements are typically block level and can be divided into four sections: page, top, main, and bottom.

Names

All of the selectors are not always used.

PAGE

wrapper
wrapper-inner
wrapper-inner-full
wrapper-minus-bottom

TOP

top-wrapper
top
top-inner

MAIN

main-wrapper
main
main-inner

BOTTOM

bottom-wrapper
bottom
bottom-inner
